## PROJECTS

**svbdigitalmarketingservices.com/**

- Developed a modern, responsive WordPress website for a digital marketing and online growth services company.
- Built structured service sections with Elementor and dynamic content to present SEO, PPC, social media, content marketing, and other digital solutions effectively.
- Enhanced UI/UX, mobile responsiveness, website performance, SEO structure, and overall user engagement for a professional online presence.

**800silentpod.com/**

- Developed and customized a responsive WordPress website for a soundproof pod and workspace solutions business.
- Built and managed website layouts using WPBakery Page Builder with customized sections and reusable page components.
- Integrated and managed WordPress plugins and dynamic content based on project requirements.
- Improved UI/UX, website performance, responsiveness, and security for a smooth user experience.

**800pergola.com/**

- Developed a responsive WordPress website for a Dubai-based client in the pergola and outdoor solutions industry.
- Created customized product, service, and project showcase sections using Elementor.
- Implemented ACF and Custom Post Types for dynamic content management and easy updates.
- Improved UI/UX, responsive design, website performance, SEO structure, and security.

**abovetherestbuildingservices.com/**

- Developed a service-focused WordPress website for a commercial building maintenance company serving clients across New England.
- Created dedicated service pages, project/work sections, contact forms, and quote-request functionality to support lead generation and client inquiries.
- Managed website performance, responsiveness, SEO structure, maintenance, and security while working with Avada Builder.

**saidattaastropune.com/**

- Developed a custom WordPress theme by converting an HTML/CSS template, delivering a responsive and user-friendly design across all devices.
- Utilized plugins like Advanced Custom Fields (ACF), Contact Form 7, WP Mail SMTP, Custom Post Type UI, and WPBakery Page Builder to add advanced functionality and layout flexibility.
- Modified and optimized plugin components to meet unique project requirements and deliver improved site performance.
- Implemented dynamic content workflows to simplify content updates and provide a smooth, consistent user experience.

**ledtvexpert.com/**

- Built a fully customized WordPress website for LEDTV Expert, transforming a static HTML/CSS design into a responsive and performance-optimized digital platform.
- Utilized plugins like Advanced Custom Fields (ACF), Contact Form 7, WP Mail SMTP, Custom Post Type UI, and Elementor Page Builder to add advanced functionality and layout flexibility.
- Developed dynamic sections and admin-friendly modules to simplify updates and maintain a consistent user experience across all devices.

**kohinoorbirdnetting.com/**

- Developed a clean, responsive web front-end using HTML5 and modern CSS, ensuring the site looks and functions well across devices.
- Ensured performance optimisation (by minimising CSS/JS, reducing render-blocking resources) for faster page loads and better user experience.
- Leveraged JavaScript to add interactive elements (such as menu toggles, animations, and smooth scrolling) that enhance user engagement.
- Collaborated closely with design and content teams to align the website's aesthetics and functionality with business objectives and user needs.
- Incorporated brand-relevant visuals and calls to action, making it easy for visitors to navigate to enquiries, service requests or product details.
